OBJECTIVE

Cyber Security Engineering student seeking a full time position after graduation in May 2026

WORK EXPERIENCE

Principal Financial Group Des Moines, IA

GRC Compliance – Security Intern

May, 2025 – August, 2025

- Answer customer questions related to Principal's security infrastructure using Responsive
- Create/Update documentation for processes and tools

Directory Services – Security Intern

May, 2024 – May, 2025

- Collaborate with the Information Security Risk Management team using AGILE/SCRUM methodologies
- Collaborate with many security teams to automate multiple processes using ServiceNow and other tools
- Create/Update documentation for processes and tools

Projects:

Single Sign-On (SSO) Support Automation

- Automate the process to create new SSO applications in AWS using ServiceNow, Github, and Terraform

ActiveDirectory (AD) Account Disable

- Create an automated process in ServiceNow to disable unused AD process Accounts

DevOps Research and Assessment (DORA) Metrics Dashboard

- Create a dashboard that automatically pulls DORA metrics from Jira, ServiceNow, and Github to be displayed in graphs and tables in our developer portal for team leaders and managers.

Sentinel Technologies Downers Grove, IL

Threat Investigation Analyst Intern

December, 2023 – January 2024

- Investigate security incidents using a variety of tools
 - Foundational experience with Darktrace, CrowdStrike, Mimecast, Cisco AMP, and Cylance
- Communicate with customers and internal teams to handle incidents
- Communicate with internal teams to tune alarms and tickets for each customer's environment
- Create and update in depth ServiceNow Knowledge Bases for processes

Projects:

- Decommission CAN Nodes that were replaced by Palo Alto firewall hardware

Threat Investigation Analyst Intern

May, 2023 – August, 2023

Projects:

Palo Alto Firewall Replacement

- Configure new Palo Alto firewall hardware for our customers and prepare them to be shipped

Fortis ActiveDefense Category Descriptions

- Create a list of ActiveDefense categories and alarms, a description of them, and how each threat can be mitigated

EDUCATION

Iowa State University Ames, IA

Expected May, 2026

Bachelor of Science in Cyber Security Engineering

Cumulative GPA: 3.52

- Engineering Problem Solving; C; Java; Digital Logic; Computer and Network Configuration; Technical Communication; Software Development; Ethics in Cybersecurity; Embedded Systems

Projects

Sentinel Technologies

Palo Alto Firewall Replacement

- Configure new Palo Alto firewall hardware for our customers and prepare them to be shipped

Fortis ActiveDefense Category Descriptions

- Create a list of ActiveDefense categories and alarms, a description of them, and how each threat can be mitigated

Principal Financial Group

Fraud Account Deletion Automation

- Automate the process to delete fraudulent accounts and recreate them for the verified user using ServiceNow

Single Sign-On (SSO) Support Automation

- Automate the process to create new SSO applications in AWS using ServiceNow, Github, and Terraform

ActiveDirectory (AD) Account Disable

- Create an automated process in ServiceNow to disable unused AD process Accounts

DevOps Research and Assessment (DORA) Metrics Dashboard

- Create a dashboard that automatically pulls DORA metrics from Jira, ServiceNow, and Github to be displayed in graphs and tables in our developer portal for team leaders and managers.

Skills

- Devolutions: SSH into sensors to restart forwarding services
- Umbrella: Manage block/whitelist for sites
- VirusTotal: Verify IP, hash, or domain reputation
- Triage: Investigate domains for malicious files/URLs
- Splunk: Basics, fields, visualizations, time-based data
- Terraform: Managing users and conditional access policies

Continued Education

ServiceNow

- Suite Certification – Citizen Developer Core Skills
- Citizen Developer Application Creator
- Citizen Developer Process Creator
- Citizen Developer Advanced Skills

TryHackMe

- Introduction to Cyber Security
- Cyber Defense Frameworks
